

Conclusion:

1. What is the **identifier** of a homogeneous substance?
2. What characteristics are used to identify a heterogeneous **substance**?
3. What is a mixture?
4. Could a pure substance be heterogeneous? Why or Why Not?
5. Would **it** be correct to describe **flour** and water as immiscible? Why **or Why** not?
6. Give an example of a homogeneous substance and justify why it **fits** into this **class**.
7. Give an example of a heterogeneous substance. Give at least one reason why it fits this classification.
