

Data Table 1.

Chemical Combination	Observations (What changes took place?)	Chemical or Physical Change	Evidence of chem/phys change
1.			
2			
3.			
4.			

Conclusion:

1. What characteristics define a chemical change?
2. Which criteria are used to determine physical change?
3. What is a phase change?
4. Why are the containers of substances marked "Store in a dry place."?
5. Which gas was produced in procedure number two?
